NOTES:

- General search and rescue missions in a 3-season environment with no unusual hazards.
- Rope rescue refers to low, steep, and high angle environments.
- Advanced rope rescue includes all highlines and rescues with fewer than 8 members present. RROC certification required for this classification
- For use as a search element only.
- Ensure qualifications of individuals and proper equipment *prior* to utilization in alpine winter conditions.
- For all cave and/or underground missions including mines, only the Cave Rescue Team will be contacted.
- Limited capability - discuss with Team Coordinator.
- MRA Certs recognized are: R = Technical rope rescue; S = Search; I = Technical Snow & Ice Rescue.
- Search management designation for independent SAR team requires MRA "Search" certification.
- Oak Glen SAR will not be utilized on stand-alone missions. One additional team must be called to work with this team until the team gains additional experience.
